

# Reaction to fire classification report No. 21249F

# Owner of the classification report

MyDek Limited 11 Arkwright Road Reading, RG2 0LU United Kingdom

# Introduction

This classification report defines the classification assigned to the product *Delta20, Delta30, Innova* in accordance with the procedures given in the standard EN 13501-1:2018: Fire classification of construction products and building elements - Part 1: classification using data from reaction to fire tests.

This classification report consists of 8 pages and may only be used or reproduced in its entirety

# 1. DETAILS OF CLASSIFIED PRODUCT

#### a) <u>General</u>

The products *Delta20, Delta30, Innova* are defined as coated aluminum decking products.

Its classification is valid for the following end use application(s): Used as decking product in flooring applications.

#### b) Product description

This description is based on information given by the sponsor.

# 3. CLASSIFICATION AND FIELD OF APPLICATION

#### a) <u>Reference of classification</u>

This classification has been carried out in accordance with EN 13501-1:2018.

#### b) **Classification**

The product *Delta20, Delta30, Innova* in relation to its reaction to fire behavior is classified as:

| Fire behavior    | Smoke production |
|------------------|------------------|
| A2 <sub>FL</sub> | s1               |

## c) Field of application

This classification for the product as described in §1b, is valid for the following end use applications:

- Substrate: Calcium silicate substrate referenced "Promat Supalux" having a thickness of 9mm and a density of 950kg/m<sup>3</sup>
- Airspace: 0mm Product applied in direct contact with the substrate
- Fixing: Mechanically fixed
- Joints: Joints permitted

This classification is valid for the following product parameters:

- Coating colour: All colours with PCS ≤3,5MJ/m<sup>2</sup>
- Coating reference: Interpon D2525 (D2000 Series)
- Nominal coating thickness : 120 microns
- Nominal coating application rate: 0.162-0.1872kg/m<sup>2</sup> (varies only with s.g. of colour)
- Specific gravity: 1.35-1.56g/cm<sup>3</sup> (varies only with colour as described)
- Permitted aluminum profiles: Delta20, Delta30, Innova
- Nominal profile height (aluminium): 30mm (Delta30), 20mm (Delta20 & Innnova)
- Nominal aluminium thickness (face): 2.5mm (Delta20 & Delta30), 1.5mm (Innova)
- Nominal aluminium profile weight per unit area: 13.866kg/m<sup>2</sup> (Delta30), 12.47kg/m<sup>2</sup> (Delta20), 8.66kg/m<sup>2</sup> (Innova)
- Use of flame retardants: None
- Product composition: No variation allowed
- Product construction: No variation allowed

## 4. **RESTRICTIONS**

At the time the standard EN 13501-1:2018 was published, no decision was made concerning the duration of validity of a classification report.

Provisions of Regulation (EU) 305/2011, commonly known as the Construction Products Regulation (CPR), prevail over any conflicting provisions in the harmonized standards and technical specifications.

# 5. <u>WARNING</u>

This classification report does not represent type approval or certification of the product.

According to the information mentioned by the sponsor on the technical information sheet there was no product standard for CE marking available at the time the classification report for the tested material/product was drafted.

When such a product standard is published, this report may be submitted again to the laboratory to evaluate the adequacy of the report for CE marking.
